Innovative Design by St. Marys Box Company Receives Trademark

SUMMARY: St. Marys Box Company proudly announces receiving a trademark for their WRL[®] (Wood Replacement Log). Manufactured from 100% corrugated, the inventive design consists of cylinders of wrapped corrugated paper with a number of attractive features. The WRL[®] is strong yet lightweight, absorbs vibrations, is 100% recyclable, non-petroleum based and exempt from many export regulations pertaining to wood packing material. Designed as an integral part of the company's PennyPincher Pallet[™], the WRL[®] also has proven value on its own as a key component in internal packaging. Additionally, the WRL[®] can be customized to the application affording greater flexibility to the purchaser.

St. Marys, PA – February 12, 2008 – The St Marys Box Company today announced receiving a trademark for their WRL[®] (Wood Replacement Log). Constructed of elongated cylinders of wrapped corrugated paper, the WRL[®] is strong due to the thousands of small cylinders (corrugated flutes) within each WRL[®]. This strength comes in a lightweight design making the WRL[®] safe for handlers on both the shipping and receiving ends. An added benefit to the lightweight design is a reduction in shipping costs.

Currently, the WRL[®] is the main component of St. Marys Box Company's environmentally friendly PennyPincher Pallet[™], a patented, custom corrugated pallet designed to make shipping products economical. Since corrugated materials have cushioning properties, another application of the WRL[®] is internal packaging, minimizing transit vibration and other shocks that are incurred during shipping. By varying the length, width (thickness) and number of wraps of corrugated paper the WRL[®] can be customized to different applications.

From the beginning, St. Marys Box Company recognized an obligation to provide a quality product that would sustain our natural resources for future generations. Using recycled material in the manufacture of the WRL[®] that is then recyclable for the customer helps to satisfy that commitment.

“Since the first concept in 1997 to the present day high-speed manufacture of the WRL[®], we have strived to provide a superior product with economical benefits for our customers and sustainability for future generations,” says William Pistner, President of St. Marys Box Co. “We feel we have achieved that and more making the WRL[®] a decisive part of the shipping business.”

A family owned corporation with a strong commitment to the community, St. Marys Box Company has been manufacturing a full line of corrugated products for more than 55 years. They are a full-service, quality corrugated supplier providing customers with a complete line of products and applications. Their policy is to provide 100% Customer Satisfaction and 100% On-Time Deliveries while looking forward to the needs of future generations. With the development and trade marking of the WRL[®], St. Marys Box Co. continues to be on the leading edge of new and innovative corrugated products.
